

## **PAT HENNIN** (MD, MA & NJ)

Pat and Patsy Hennin started Shelter Institute in the early 1970's on the premise that house building and home ownership are affordable. They broke down the house building process and studied all of the various systems to create a clear picture to homeowners, would-be homeowners, builders and engineers.

## **MARY MCGUIRE** (MD, MA & NJ)

I furnished my house back then with furniture that I rehabbed from yard sales and goodwill. I used a wide variety of products to refinish each piece and really perfected mixing and the application process. I received so many compliments on my work that I sold refinished furniture in an antique mall in Oxford, MS. The neat thing about refinishing is that it is a bit of art and a bit of science combined.

### **CHAINSAW TUNEUP**

- Friday, Saturday & Sunday 1:00 pm

Chainsaw maintenance is 90% of chainsaw use. This 45-min workshop will save you time and money in repairs. No special tools required. Learn how to make your chainsaw work for you! This talk walks you through the maintenance and use of one of the most useful tools: the chainsaw. As a lumberjack in Idaho in the late sixties, Pat learned how to completely disassemble, clean and reassemble a chainsaw at dusk in order to be most productive during the daylight hours. He has felled trees large and small, limbed them forty feet in the air and rebuilt hundreds of saws. Whether you have a chainsaw that you use once a year to clean up your yard or are thinking of buying your own woodlot to maintain, this workshop will save you hours and hundreds of dollars in repair-shop and small-engine fees.

Pat will provide a chainsaw to disassemble, clean and reassemble walking you through all of the pieces that may need to be repaired, replaced or just cleaned as well as the best ways in which to clean them. From adjusting the engine speed, sharpening the chain to what type of fuel ratio to mix; he will cover it all.

### **INTRO TO MILK PAINT (MARY MCGUIRE)**

- Friday 3:00 pm, Saturday 10:30 am, Sunday 10:30 am

- Mixing
- Storing
- Customizing colors
- Painting various surfaces (raw wood, latex paint, chalk paint)
